Reporting Rendering Provider, Service Location and Bill Type Information on Your Claim

Beginning January 23, 2015, claims that cannot be correctly reported to our federal partners will be ***denied***. Federal reporting errors are most often caused by missing or incorrectly reported:

- Rendering providers,
- Service locations, and
- Bill types

When do I need to report a rendering provider on my claim?

If your Pay-to provider is a multispecialty or single-specialty **group** you must declare the NPI of the individual who provided the service in box 24J of the CMS 1500 or in Loop 2310B segment NM109 of the 837P. Please be aware the rendering provider must be an individual that is enrolled with Idaho Medicaid as a part of your group. There are no exceptions to this rule and this will always be required on the claim.

When do I need to report a service location on my claim?

If your NPI is used to bill more than one line of business — for example, you are a hospital who bills inpatient, outpatient, lab, radiology and physician services under the same NPI — you must declare the line of business for which you are billing using the appropriate service location indicator in box 32a of the CMS 1500 or in the REF segment of loop 2310C of the 837p for professional claims. For institutional claims use box 2 of the UB04 or the REF segment of loop 2310E. There are no exceptions to this rule and this will always be required on the claim.

When do I need to report a rendering provider AND a service location on my claim?

If your NPI is used to bill more than one line of business and one of those lines of business is a group of providers, both the service location and the rendering must be on the claim to appropriately report the claim. If the service location is not affiliated to the Pay-to provider, the information will be ignored and your claims may pay incorrectly or deny.

What does the Service Location Identifier look like?

The Service location identifier is your Pay-to NPI, a dash (-), and three numeric digits; for example, 1234567859-001. If the service location entered on your claim does not reflect your NPI and three digit suffix the claim might pay incorrectly or deny.

What edits are associated with incorrectly reported Rendering Provider, Service Location, and Bill Type Information?

Edit	Edit Description	CARC #	CARC Description	RARC #	RARC Description
6007	CLAIM SPECIALTY REQUIRED	16	Claim/service lacks information or has submission/billing error(s) which is needed for adjudication.	MA130	Your claim contains incomplete and/or invalid information, and no appeal rights are afforded because the claim is unprocessable. Please submit a new claim with the complete/correct information.
6019	CLAIM TYPE REQUIRED	16	Claim/service lacks information or has submission/billing error(s) which is needed for adjudication.	N255	Missing/incomplete/invalid billing provider taxonomy.

Examples of when Edit 6007 and 6019 will fire on your claim

Edit	Is there a Service Location on the claim?	Is there a Rendering Provider on the claim?	Edit 6007 may have fired because:	Possible Solution
6007	No	No	The claim required a service location, a rendering provider or both.	Resubmit the claim with the appropriate service location, rendering provider or both.
6007	N/A	Yes	The rendering provider is not an individual.	Resubmit with the NPI of the individual who rendered the service on the claim.
6007	No	Yes	The service location was mistakenly entered in the rendering provider field.	Resubmit with the appropriate service location identifier in the correct field.
6007	Yes	No	The rendering provider is in the Service Location field.	Resubmit the claim with the rendering provider's NPI in the correct field.
Edit	UB-04	CMS1500	Edit 6007 may have fired because:	Possible Solution
6007	Yes	N/A	A professional claim was billed using UB04 claim form.	Resubmit the claim on the appropriate claim form.
Edit	Bill Type		Edit 6019 may have fired because:	Possible Solution
6019	No		The required bill type is missing or incorrect	Resubmit the claims with the appropriate bill type.
