1. Suppliers

This section covers all Medicaid services provided by the following Supplier provider types and specialties and any Medicaid provider distributing durable medical equipment (DME) and durable medical supplies (DMS).

- Assistive Technology Supplier
- Contractor-Home Modifications
- Durable Medical Equipment & Medical Supplies
- Durable Medical Equipment & Medical Supplies – Dialysis Equipment & Supplies
- Durable Medical Equipment & Medical Supplies – Oxygen Equipment & Supplies
- Durable Medical Equipment & Medical Supplies – Parenteral & Enteral Nutrition
- Emergency Response System Companies
- Non-Pharmacy Dispensing Site
- Optometric Supplies
- Pharmacy DME – All pharmacy DME providers must be registered with the Board of Pharmacy (*IDAPA 27.01.01*)
- Pharmacy – Clinic
- Pharmacy – Community / Retail
- Pharmacy – Home Infusion Therapy
- Pharmacy – Institutional
- Pharmacy – Specialty
- Pharmacy – Mail Order
- Prosthetic/Orthotic Supplier

Sections of the Idaho Medicaid Provider Handbook applicable in specific situations are listed throughout the handbook for provider convenience. Handbook sections that always apply to this provider type include the following:

- [General Billing Instructions](#);
- [General Provider and Participant Information](#); and
- [Glossary](#).

1.1 Provider Qualifications

Suppliers in any state are eligible to participate in the Idaho Medicaid Program. They must be licensed in the state where the services are performed and enrolled as a medical equipment vendor with Medicare and Idaho Medicaid prior to submitting claims for services. Providers must follow the provider handbook and all applicable state, and federal, rules and regulations.

See [General Provider and Participant Information](#), Idaho Medicaid Provider Handbook for more information on enrolling as an Idaho Medicaid provider.

1.2 Eligible Participants

Participants with Medicaid Basic and Enhanced Plans are eligible to receive DMEPOS. When billing for participants enrolled in other benefit plans, refer to [General Provider and Participant Information](#), Idaho Medicaid Provider Handbook for coverage. Providers must check eligibility prior to delivery to validate coverage as some participants may be on restrictive programs that include their DME and DMS. Eligibility may be checked by calling Idaho Medicaid Automated Customer Service (MACS) at 1 (866) 686-4272; or through the Trading Partner Account on the DXC Technology's [Idaho Medicaid](#) website.

1.2.1 Deceased Participants

Deceased participants are not eligible for services or items. Services or items provided after the participant's date of death are not eligible for reimbursement.

1.2.2 DME and DMS for Participants Residing in Facilities

Items that are customized for a specific participant, such as prosthetics and orthotics, may be billed separately to Medicaid unless the participant is a resident of a skilled nursing facility.

1.2.2.1 Hospital, Skilled Nursing Facility

While a participant is a resident of a hospital or skilled nursing facility, DME providers may not bill for DME or DMS. However, some items may be available through Special Rates as detailed in the Long Term Care Facility, Idaho Medicaid Provider Handbook.

1.2.2.2 ICF/IID (Intermediate Care Facility for Individuals with Intellectual Disabilities)

While a participant is a resident of an ICF/IID facility, supplies are included in the per diem payment to the facility including, but not limited to, non-sterile gloves, incontinence supplies, and all other medical supplies used to save labor or linen are billed directly to the facility.

Exceptions to this include:

- Items that are customized to meet a specific participant's need and cannot be altered to be useful to another resident cost effectively;
- Prosthetics and orthotics;
- Specialized wheelchair and seating systems that cannot be altered to be useful to another resident cost effectively; and
- Authorized repairs related to a chair or seating system that is specialized to meet a specific participant's needs.

To determine if a participant is residing in an ICF/IID, providers may consult a list of Idaho ICF/IID facilities found at:

<http://healthandwelfare.idaho.gov/Portals/0/Medical/LicensingCertification/AlphaICF.pdf>.

1.2.2.3 Assisted Living Facility

While a participant is a resident of an Assisted Living Facility, basic supplies such as non-sterile gloves are included in the *per diem* payment and are billed directly to the facility. A list of Residential Care Assisted Living Facilities can be found at:

<http://healthandwelfare.idaho.gov/Medical/LicensingCertification/StateOnlyPrograms/AssistedLiving/tabid/273/Default.aspx>.

1.2.2.4 References: DME and DMS for Participants Residing in Facilities

"Durable Medical Equipment and Supplies: Provider Reimbursement." *IDAPA 16.03.09*, "Medicaid Basic Plan Benefits," Sec. 755.01. Department of Administration, State of Idaho, <https://adminrules.idaho.gov/rules/current/16/160309.pdf>.

1.2.3 EPSDT Services for Participants Under 21

Services identified as a result of Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) and which correct or ameliorate a defect will not be subject to the existing amount, scope, and duration limitations, but require prior authorization. The medical necessity for the additional service must be documented. It must be proven safe, effective and accepted as a medical practice or treatment for the condition being addressed. Additional information for EPSDT may be found in the [General Provider and Participant Information](#), Idaho Medicaid Provider Handbook.

1.2.4 Home Health Participants

If a participant is receiving home health services, the home health agency is responsible for any DME and supplies that are necessary. Information on home health can be found in the [Agency Institutional](#), Idaho Medicaid Provider Handbook.

1.2.5 Hospice Participants

If a participant is receiving hospice services, the hospice agency is responsible for any DME and supplies that are necessary for the palliation and management of the participant's terminal illness. Hospice agencies often provide incontinent and other DME supplies for participants residing in an assisted living facility. DME providers should review the hospice supply list available from either the facility or the hospice agency. Hospice agencies often also cover some DME items for those residing in skilled nursing facilities and ICF/IIDs. Information on hospice can be found in the [Agency Institutional](#), Idaho Medicaid Provider Handbook.

1.2.6 Referrals

Effective 2/1/16, a referral from the Healthy Connections primary care physician is not required for DME. Information on the Healthy Connections program can be found in the [General Provider and Participant](#), Idaho Medicaid Provider Handbook.

1.2.7 School-Based Services

Durable medical equipment and supplies for Medicaid participants to use in a school setting must be billed to the school. Reimbursement rates, policies and documentation requirements are the same as if the supplier had billed Medicaid directly. See the [Agency Professional](#), Idaho Medicaid Provider Handbook for more information.

1.2.8 Waiver Services for Enhanced Plan Participants

Participants enrolled in the Medicaid Enhanced Plan and either the Aged and Disabled (A&D) or the Adult Developmental Disabilities (DD) Waiver programs are eligible for services beyond the scope of the Idaho Medicaid State Plan. See the [Waiver Services](#) section of this handbook for more information.

1.3 Covered Services and Limitations: General Requirements

Idaho Medicaid will purchase or rent durable medical equipment (DME) and disposable medical supplies (DMS) for eligible participants residing in any setting in which normal life activities take place provided they are reasonable and medically necessary for the treatment of a disability, illness or injury. Initial set-up, freight, postage, delivery, installation, instruction, fitting (except as detailed in Prosthetics and Orthotics), adjustments, measurement, demurrage, facility visits or transportation are considered to be inclusive in a provider's reimbursement for the item or service.

All DMEPOS items with designated HCPC codes listed on the Idaho Medicaid [Numerical Fee Schedule](#) could qualify for coverage when determined to meet medical necessity per IDAPA 16.03.09.011.16. The supplied item must be the least costly means of meeting the participant's medical need. The Numerical Fee Schedule identifies medical supplies, equipment, and appliances commonly ordered for Medicaid participants. If a participant requires an item that is not listed on the Numerical Fee Schedule, a request should be submitted to the Department to assess items for coverage. This request must include justification of the medical necessity, amount of, and duration for the item or service, and all

supporting documentation. Limitations apply, such as limits based on medical necessity, the participant's place of residence, standard medical practice and quantities.

Medical equipment and supply items used by or provided to an individual other than the participant for which the items were ordered is prohibited.

The following are not covered under the DMEPOS:

- Services, procedures, treatment, devices, drugs, or application of associated services that are considered investigational or experimental;
- More costly services or equipment when an effective, less costly service or equipment is available;
- Any service specifically excluded by statute or administrative code;
- Non-medical equipment and supplies and related services; and
- Items for comfort, convenience, or cosmetic purposes (i.e. wipes, peri-wash, exercise or recreational equipment).

1.3.1 Durable Medical Equipment (DME)

Durable Medical Equipment (DME) is equipment and appliances that can withstand repeated use; is primarily and customarily used to serve a medical purpose and is generally not useful to an individual in the absence of a disability, illness or injury. DME must be new when dispensed unless specifically requested and authorized by the Department as used on a case by case basis. This includes equipment that is issued or authorized as "rent-to-purchase." It does not apply to short-term rental equipment.

1.3.1.1 Rental of Durable Medical Equipment

The Department may determine to rent or purchase DME. Rental payments (continuous or intermittent) will be applied toward the purchase price of the equipment. The equipment will be considered purchased after the tenth (10th) monthly rental payment. This includes equipment that is issued or authorized as "rent-to-purchase."

The Department of Health and Welfare may choose to continue to rent certain equipment without purchasing it such as oxygen and ventilators. The total monthly rental cost shall not exceed one-tenth of the total purchase price of the item.

Monthly rental payments include supplies, when so designated in the [CMS/Medicare DME Coverage Manual](#), and a full-service warranty. Supplies, routine maintenance, repair, and replacement are the responsibility of the DME provider during the warranty period and for continuous rental equipment.

(a) References: Rental of Durable Medical Equipment

"Capped Rental Clarification for Durable Medical Equipment (DME)." *MedicAide Newsletter*, January 2017,
<https://www.idmedicaid.com/MedicAide%20Newsletters/January%202017%20MedicAide.pdf>

1.3.1.2 Warranty Requirements

Payment will not be made for the cost of materials covered under the manufacturer's warranty. If the warranty period has expired, the provider must have documented on file the date of purchase and warranty period. Warranty information from the Manufacturer must also be available to the Department upon request. Medicaid requires the following warranty periods at a minimum:

- The power drive of a wheelchair will have a one-year warranty.
- An ultra-light or high strength lightweight wheelchair will have a lifetime warranty on the frame and cross-braces.
- All other wheelchairs will have a one-year warranty.
- All electrical components and new or replacement parts will have a six-month warranty.
- Any other DME not defined will have a one-year warranty period.

If the manufacturer denies the warranty due to user misuse/abuse, this information must be supplied when requesting approval for repair or replacement.

(a) References: Warranty Requirements

"Durable Medical Equipment and Supplies: Provider Reimbursement." *IDAPA 16.03.09, "Medicaid Basic Plan Benefits,"* Sec. 755.07. Department of Administration, State of Idaho, <https://adminrules.idaho.gov/rules/current/16/160309.pdf>.

1.3.1.3 Repairs and Replacement

If equipment has exceeded its warranty, is still medically necessary, and is no longer functional, Medicaid may pay to replace or repair the item. Equipment should only be replaced when it is more cost effective than repairs, or if the repaired equipment would no longer meet the medical needs of the participant. Idaho Medicaid has no obligation to repair or replace any piece of durable medical equipment or supply that has been damaged, defaced, lost, or destroyed as a result of neglect, abuse, or misuse of the item.

Modifiers should be included on claims to distinguish between repair and replacement items. Modifier RA should be used for replacement items and modifier RB should be used to denote parts for a repair.

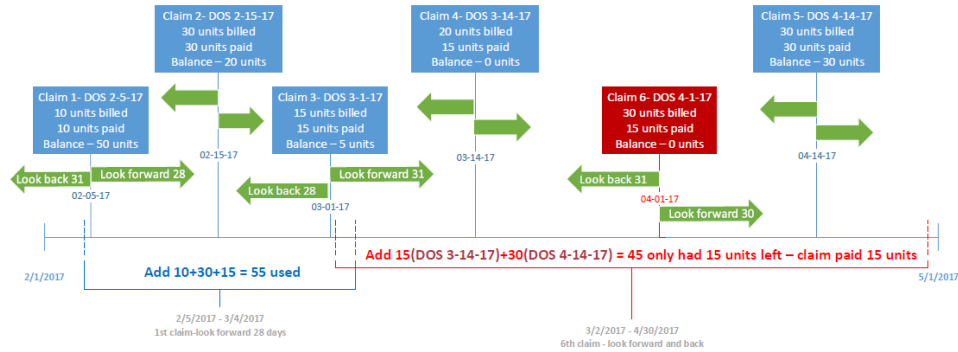

(a) References: Repairs and Replacement

"Durable Medical Equipment and Supplies: Quality Assurance." *IDAPA 16.03.09, "Medicaid Basic Plan Benefits,"* Sec. 756. Department of Administration, State of Idaho, <https://adminrules.idaho.gov/rules/current/16/160309.pdf>.

1.3.2 Disposable Medical Supplies (DMS)

DMS refers to healthcare related items that are consumable, disposable and cannot withstand repeated use by more than one individual. No more than a one-month supply of necessary medical supplies can be dispensed per rolling month unless authorized by the Department. Utilized units for supplies are not available to be dispensed again until the same day of the next month regardless of the number of days in the month.

The following diagram provides an example of how the system calculates the rolling month.

Picture illustrates how calendar month is reviewed and calculated in our system. A 'calendar' month is not a set number of days it literally means the calendar month the service is delivered in. If a member receives a service on 02-01-17 and exhausts the limitation for the month at that time, the member will be eligible for the new month as of 03-01-17. There are only 28 days between those dates. If the member again exhausts the limit on 03-01-17, the member would be eligible for the new month as of 04-01-17. There are 31 days between those dates of service. The system truly reviews days by the calendar month the service is in. Remember to look backwards based on the previous month's days and forward based on the current month's days.

For all items that are provided on a recurring basis and shipped or delivered to the participant, providers are required to have contact with the participant or caregiver/designee prior to dispensing a new supply of items. The provider must contact the participant within 14 calendar days prior to the delivery, and the participant must request a refill of supplies before they are dispensed. DMS cannot be automatically filled or shipped even with authorization of the participant. Documentation of the contact and participant order must be completed at the time of the encounter and kept on file. Retrospective statements will not be permitted as documentation of contact. Contact is required to ensure items remain necessary, existing supplies are approaching exhaustion, and to confirm any changes or modifications to the order such as a change of address.

1.3.3 Upgrades

Providers cannot bill Idaho Medicaid for an item or service different than what is provided to the participant. Doing so would be incorrect coding. Providers also cannot bill Medicaid for an item and allow the participant to pay the difference for an item of different quality. Per the Provider Agreement, IDAPA 16.03.09.210.03, "Medicaid Basic Plan Benefits," and CFR

providers must accept Idaho Medicaid's payment as payment in full. However, if the participant desires to purchase a separate non-covered item, this would not be considered an upgrade. For example, if a tray for a wheelchair is denied for not being medically necessary the participant could decide to purchase that item separately. See the [General Provider and Participant](#), Idaho Medicaid Provider Handbook for more information about charging participants.

1.4 Covered Services and Limitations: Criteria

Idaho Medicaid follows criteria set in the Idaho Medicaid Provider Handbook and the [Idaho Medicaid DMEPOS PA Policy and Medical Criteria](#). Covered items and services not detailed in these documents default to criteria established by Medicare in the DMAC CMS/Medicare DME Coverage Manual or local or national coverage determinations (LCD or NCD) when available. Medicare coverage criteria can be found at <https://med.noridianmedicare.com/web/jddme/policies>. Adherence to these documents is a condition of payment. Unless otherwise stated all items and services under this section must also comply with [Covered Services and Limitations: General Requirements](#).

1.4.1 Breast Pumps

Electronic and manual breast pumps (E0602 and E0603) are covered for women who choose to breast feed. Coverage is limited to one every three years. Pumps should be billed as purchase only and to the mother's Medicaid ID number. Idaho Medicaid will not authorize an additional breast pump purchase within the three-year limitation. Breast pumps prior to the birth is considered a convenience and is not covered by the Department.

Hospital grade breast pumps (E0604) are available for rental only, for up to three months maximum, and must be prior authorized by the Department. Rental is not subject to the three-year limitation and may be billed to the baby's Medicaid ID number, if the mother is no longer eligible. Criteria for hospital grade breast pumps is available in the [Idaho Medicaid DMEPOS PA Policy and Medical Criteria](#).

1.4.1.1 References: Breast Pumps

1.4.2 Home Modifications

Home modifications are not covered in DMEPOS benefits under the Idaho Medicaid State Plan. Home modifications may be available for participants who are eligible under a Waiver program. See [Covered Services and Limitations: Waiver Services](#) for more information.

1.4.3 Incontinence Supplies

Incontinence supplies including diapers, liners, pull-ups, and under-pads, are covered for participants who have a medical need for the items based on their diagnosis. These items are not covered for participants under 4 years of age or participants in long-term care (nursing facility) settings.

The Department will only reimburse for pull-ups if the participant is able to perform toileting activities on their own some of the time, and when briefs would prevent independence and cause a risk to the participant. Pull-ups are not covered for the convenience of the caregiver. Documentation must be kept on file with a statement of necessity from the ordering physician or non-physician practitioner that the participant meets the requirements for coverage. Toilet training plans are encouraged for participants transitioning out of diapers and briefs.

Any combination of disposable diapers, liners, or pull-ups is limited to a total of 240 units per rolling month. Under-pads are limited to 150 units per rolling month. Additional supplies may be prior authorized if the request includes medical justification of why the maximum limitation will not meet the participants needs. Authorizations that exceed limitations are only for acute, short term medical circumstances. See the [Idaho Medicaid DMEPOS PA Policy and Medical Criteria](#) for additional information.

1.4.4 Nutritional Products

Nutritional products include enteral, and parenteral nutritional products including tube and oral administration, infant formula, foods for inborn errors of metabolism and oral supplements. Breast milk, animal milk or plant-based milk is not a covered benefit.

1.4.4.1 Enteral Nutrition

Enteral nutrition is any method of caloric delivery that uses the gastrointestinal tract such as feeding tube or oral administration. Enteral nutrition is covered for tube feeding when medically necessary according to the criteria described in the CMS/Medicare DME Coverage Manual. Claims must be billed with a BA modifier.

Nutrition received orally, including supplements such as thickener, are covered when necessary to meet the caloric needs of a participant who is unable to maintain growth, weight, and strength through traditional foods alone. Claims must be billed with a BO modifier and the NDC for the product.

Additional information specific to the coverage of [Infant Formula](#) is presented in the section below.

1.4.4.2 Infant Formula

Infant formula is covered under [Enteral Nutrition](#) and must follow all requirements in the section above. Idaho Medicaid will cover medical grade infant formula for infants (under one year of age) requiring dietary management for a diagnosed medical condition that restricts the use of conventional sources of nutrition. Formulas that may be eligible are those that have been declared exempt by the U.S. Food and Drug Administration and require a physician’s order to obtain. The American Academy of Pediatrics describes gastroesophageal reflux (GER) “as a normal developmental phenomenon that will usually resolve with maturation.” GER does not typically restrict the use of conventional sources of nutrition and, therefore, would not be a valid diagnosis for infant formula through the Medicaid program.

Traditional (non-medical grade) infant formulas are only covered for participants that are tube fed. Participants should be directed to the [Women, Infants, and Children \(WIC\)](#) program for traditional formula that would be administered orally.

1.4.4.3 Parenteral Nutrition

Parenteral nutrition is the delivery of calories directly into the veins. Parenteral nutritional products are covered when medically necessary according to the criteria described in the CMS/Medicare DME Coverage Manual.

1.4.4.4 S9435 Medical Foods for Inborn Errors of Metabolism

Medical foods for inborn errors of metabolism are only covered for a diagnosis of phenylketonuria. Claims should be billed with one (1) unit per month of food.

1.4.4.5 Documentation: Nutritional Products

The vendor must obtain and keep the following documentation on file for five years after the date of service:

- Physician's order with daily calorie count to be supplied, length of need, diagnosis, and documentation of medical necessity.
- A Nutrition Plan of Care (POC) approved by the physician that includes appropriate nutritional history, the participant's current height, weight, age, goals for weight gain or weight maintenance, medical diagnosis, steps to decrease the participant's dependence on nutritional supplements or detail why that is not possible, and current enteral or oral nutritional product.
- For participants under age 21, a growth chart including weight or height percentile must be included.

The provider must obtain a nutritional history for each new participant which should define the patient's need for the oral or enteral nutritional products. This may include:

- The medical diagnosis that makes the nutritional product necessary
- Appetite and/or oral nutritional intake
- GI history supporting need for therapy, such as nausea, vomiting, and/or diarrhea
- Oral feeding skills and ability: Is the participant physically able to eat orally?
- Outlined history of failure to thrive
- Behaviors or lifestyle barriers that interfere with nutritional intake
- Detailed failed trial of modified traditional diet supporting need for current treatment

The schedule for reviewing and updating the nutritional plan will be determined by individual needs and progress but must be done at least annually.

1.4.4.6 Reimbursement: Nutritional Products

One unit of a nutritional formula is defined in the HCPCS manual as 100 calories rather than the number of cans. For billing purposes, providers must convert the number of cans dispensed to the number of 100-calorie units dispensed.

A large number of nutritional products are assigned to each HCPCS code, and the Department recognizes that one product may be costlier. Enhanced reimbursement is available for medically necessary products for which there are no substitutes, and where the maximum allowable fee does not adequately cover the provider's wholesale costs. For those products, providers may use a GD modifier and follow the same procedure that is required for the manually priced codes.

If a procedure code shows a zero on the Idaho Medicaid [Numerical Fee Schedule](#), the code is manually priced, and an invoice is required to be attached to the claim. For payment consideration, the following information must be included:

- Number of calories per day ordered by the physician;
- Number of calories per can;
- Number of cans per case; and
- Recent copy of the invoice including shipping costs or MSRP.

1.4.5 Oxygen Services

Medicaid covers medically necessary oxygen services for participants that meet the DME MAC coverage criteria. Refer to the following sections for exceptions to DME MAC requirements. If a participant under the age of 21 does not meet the criteria, a prior authorization may be requested under the [Early and Periodic Screening, Diagnostic and Treatment \(EPSDT\)](#) program.

A completed [Certificate of Medical Necessity CMS-484 Oxygen](#) (CMN) signed by the physician must be attached to each claim. A separate physician’s order is not necessary. The laboratory evidence justifying the use of oxygen must be included with the first claim for oxygen therapy for the participant. The CMN and laboratory evidence must be kept on file and will remain in effect for one year from the date the test was taken, unless a lifetime need is indicated. All claims submitted electronically must include the oxygen information on each transaction.

Medicaid does not accept Oxygen, “PRN,” or “As-needed” prescriptions. Clinical trials are not covered.

1.4.5.1 Exceptions to Lab Studies required by DME MAC

Age 0—6 Months

- Lab studies are not required.
- Prior authorization (PA) is not required but must be a physician-ordered therapy.

Age 7 Months—20 Years

- Requires lab studies and medical necessity documentation.
- PA is not required except for conditions that do not meet lab study parameters.

1.4.5.2 Cluster Headaches

Medicaid may prior authorize (PA) oxygen for participants with a diagnosis of cluster headaches. Criteria may be found in the Idaho Medicaid DMEPOS PA Policy and Medical Criteria. Lab studies are not required.

When billing for oxygen that is necessary to treat cluster headaches, the CMN attached to the claim indicating that the oxygen is *for cluster headaches*.

1.4.5.3 Ventilator Dependent Participants

Idaho Medicaid will authorize payment of oxygen services when the participant is ventilator dependent. The participant does not have to meet the PO₂ level of 55 mm Hg or arterial oxygen saturation at or below 88 percent to qualify for oxygen supplies. The supplier must use the appropriate diagnosis code to indicate that the participant is ventilator dependent.

1.4.5.4 Payment Methodology

Idaho Medicaid pays for medically necessary liquid or gas oxygen, or an oxygen concentrator with an all-inclusive monthly rate found on the Idaho Medicaid [Numerical Fee Schedule](#). This rate includes the rental of the delivery system, its contents, maintenance, repair, and any necessary supplies. Separate payments may be made for both stationary and portable systems when medically necessary. Suppliers may bill equipment for the first 36 months, and then the contents afterwards. Oxygen concentrators, however, are considered purchased after a 10-month rental. If a participant is on both stationary and portable oxygen, the reasonable useful lifetime (RUL) for equipment will be calculated separately. In the event of theft or damage beyond repair, a prior authorization will be required to receive new equipment.

If the participant owns a stationary or portable oxygen delivery system Medicaid will pay the monthly all-inclusive rate for the compressed gas or liquid contents. Supplies are only separately payable for oxygen concentrators, and only if the participant owns the equipment.

All rentals must specify actual, inclusive dates of rental and must be billed monthly. For participants who are dually eligible for both Medicare and Medicaid, all Medicare policies must be followed. After 36 months of Medicare payment, the provider may not shift payment for the equipment to Medicaid.

Providers should bill the following modifiers on claims for oxygen supplied through stationary equipment:

Modifier	Description	Reimbursement
QE	Prescribed amount of oxygen is less than 1 liter per minute (LPM).	Paid at 50%.
QF	Prescribed amount of oxygen is greater than 4 liters per minute (LPM) and portable oxygen is prescribed.	Paid at 150%.
QG	Prescribed amount of oxygen is greater than 4 liters per minute (LPM).	Paid at 150%.

1.4.6 Prosthetic and Orthotics

Medicaid covers medically necessary prosthetic and orthotic devices and related services that artificially replace a missing portion of the body, or support a weak or deformed portion of the body. Cosmetic items or those for convenience are not covered except for artificial eyes and prefabricated breast prosthetics. Electronically powered or enhanced prosthetic devices of any kind are not covered. Prior authorization requests must be received by the Department within ninety (90) days of the attending physician's order.

A new permanent limb prosthesis is only covered when the residual limb size is considered stable. Prosthetic limbs must be guaranteed to fit properly for three (3) months from the date of service. A temporary lower limb prosthesis may be covered when the attending physician documents it is in the best interest of the participant's rehabilitation prior to a permanent limb prosthesis becoming available.

1.4.6.1 Customization and Fitting

All prosthetic and orthotic devices that require customization and/or fitting must be provided by an individual who is certified or registered by the American Board for Certification in Orthotics and Prosthetics. Any adjustments within three (3) months of purchase are the responsibility of the provider at no additional cost to Medicaid or the participant. Refitting is limited to once per year, unless ordered by the attending physician with documentation of a major physical change. Prior authorization is required for all refitting and alterations.

1.4.6.2 Repair and Modification

Repairs and modifications will be covered when they are less costly than a replacement. Repairs and modification to existing prosthetic or orthotic equipment will be covered by the Department when it no longer meets the medical needs of the participant, whether the Department originally purchased the item or not. Any modifications necessary within three (3) months of an item's purchase by the Department are the responsibility of the provider at no additional cost to Medicaid or the participant. Repairs and modification are limited to once per year unless ordered by the attending physician with documentation of a major physical change. Prior authorization is required for all repairs and modifications.

1.4.6.3 Replacement

A replacement prosthesis or orthotic device is covered when it is less costly than repairing or modifying the current prosthesis or orthotic device. Any replacements needed within three (3) months of an item's purchase are the responsibility of the provider at no additional cost to Medicaid or the participant. Replacement for prosthetic devices is not covered within sixty (60) months of the date of purchase, except in cases where there is clear documentation that there has been major physical change to the residual limb, and a replacement is ordered by the attending physician.

1.4.6.4 Braces

Corsets and canvas braces with plastic or metal bones are **not** covered. However, special braces enabling a participant to ambulate will be covered when the attending physician

documents that the only other method of treatment for this condition would be application of a cast.

1.4.6.5 Shoes and Accessories

Corrective shoes, or modifications to an existing shoe owned by the participant, are covered only when they are attached to an orthosis or prosthesis or when specially constructed to provide for a totally or partially missing foot. Shoes and accessories such as mismatched shoes, comfort shoes following surgery, shoes to support an overweight individual, or shoes used as a bandage following foot surgery, arch supports, foot pads, metatarsal head appliances or foot supports are **not** covered under the program.

1.4.6.6 References: Prosthetic and Orthotics

"Prosthetic and Orthotic Services." *IDAPA 16.03.09, "Medicaid Basic Plan Benefits,"* Sec. 771 – 775. Department of Administration, State of Idaho, <https://adminrules.idaho.gov/rules/current/16/160309.pdf>.

1.4.7 Vehicular Modifications

Vehicular modifications are not within the definition of durable medical equipment as they are a component of a vehicle that is not medical in nature. Modifications may be available for participants through a Waiver program. See [Covered Services and Limitations: Waiver Services](#) for more information.

1.4.8 Wheelchair Seating Systems and Accessories

Specially designed seating systems and accessories for wheelchairs may be replaced no more than once every five years. Seating systems and accessories for participants in growth stages must provide for system enlargement without complete system replacement.

1.4.9 References: Covered Services and Limitations: Criteria

"DMEPOS PA Policy and Medical Criteria." *MedicAide Newsletter*, January 2018, <https://www.idmedicaid.com/MedicAide%20Newsletters/January%202018%20MedicAide.pdf>.

1.5 Covered Services and Limitations: Waiver Services

Certain medical equipment and supplies are covered for Medicaid Enhanced Plan participants who are also on the Aged and Disabled (A&D) Waiver or the Adult Developmental Disabilities (DD) Waiver. These are services beyond the scope of the Idaho Medicaid State Plan. Unless otherwise stated all items and services under this section must also comply with [Covered Services and Limitations: General Requirements](#). The following may be covered under certain conditions for Waiver participants.

- Diverter valves for bathtub.
- Eating/feeding utensils, such as rocker knives and special plates with rims.
- Personal Emergency Response System (PERS) services.
- Home improvements such as:
 - Timers.
 - Wheelchair lifts or ramps.
 - Electrical wiring.
 - Structural modification to the house.
- Lift devices.
- Wheelchair lifts for vans.

All other items must be submitted to the Medical Care Unit (MCU) for review. If the item cannot be covered under the State Plan's DME program, it may be considered under a Waiver benefit. Items must be the least costly means of meeting the needs of the participant.

1.5.1 Environmental Accessibility Adaptations

Environmental Accessibility Adaptations include minor housing modifications that are necessary to enable the participant to function with greater independence in the home, or without which, the participant would require institutionalization or have a risk to health, welfare, or safety. Environmental Accessibility Adaptations must be prior authorized.

Such adaptations may include, but are not limited to:

- Installation of ramps and lifts.
- Widening of doorways.
- Modification of bathroom and kitchen facilities.
- Installation of electric and plumbing systems which are necessary to accommodate the medical equipment and supplies necessary for the welfare of the participant.

Environmental/Home Modifications Billing			
HCPCS	Description	Diagnosis	Place of Service
S5165	Environmental Accessibility Adaptations	ICD-10-CM code for participant's disability as the primary diagnosis and Z74.2 as the secondary diagnosis.	12 Home

1.5.1.1 Limitations

Permanent modifications are limited to modifications to a home owned by the participant or the participant's family when the home is the participant's principal residence. Portable or non-stationary modifications may be made when such modifications can follow the participant to the next place of residence.

Participants on the Adult Developmental Disability (DD) Waiver must be twenty-one (21) years of age to use this service. There is no age restriction for participants on the Aged and Disabled (A&D) Waiver.

Improvements to the home that are not of direct medical or remedial benefit to the participant are excluded, such as:

- Air conditioning
- Carpeting
- Repairs (roof, plumbing, or electrical, etc.)

1.5.1.2 Provider Qualifications

Modification services must be completed with a permit or other applicable requirements of the city, county, or state in which the modifications are made. The provider must demonstrate that all modifications, improvements, or repairs are made in accordance with local and state housing, building, plumbing and electrical codes and/or requirements for certification.

1.5.2 Personal Emergency Response System (PERS)

Personal Emergency Response Systems (PERS) are provided to monitor the participant's safety and/or provide access to emergency crisis intervention for emotional, medical, or environmental emergencies through the provision of communication connection systems. The

system does not include monthly telephone service. Installation is limited to once per residence and includes the first month of service.

PERS must be prior authorized by the Bureau of Long Term Care (BLTC). Services are limited to participants who:

- Rent or own their home;
- Are alone for significant parts of the day;
- Have no regular caretaker for extended periods of time; and
- Would otherwise require extensive routine supervision.

Participants on the DD Waiver must be twenty-one (21) years of age to use this service. There is no age restriction for participants on the Aged and Disabled (A&D) Waiver.

Personal Emergency Response System (PERS) Billing			
HCPCS	Description	Diagnosis	Place of Service
S5160	Initial Installation	Appropriate Primary ICD-10-CM code and Z74.2 as a secondary diagnosis.	12 Home
S5161	Monthly service, 1 Unit = 1 month		

1.5.2.1 Provider Qualifications

Providers of PERS must demonstrate that the devices installed in participant's home meet Federal Communications Commission (FCC) standards, Underwriter's Laboratory (UL) standards, or equivalent standards. Providers must be able to provide, install, and maintain the necessary equipment and operate a response center capable of responding on a 24-hours a day, seven days per week basis.

1.5.4 Specialized Medical Equipment and Supplies

Specialized medical equipment and supplies for the Aged and Disabled (A&D) Waiver and the Developmental Disabilities (DD) Waiver include devices, controls, or appliances. These equipment and supplies must enhance the participant's daily living and enable the participant to control and communicate within their environment. This also includes items necessary for life support, ancillary supplies, and equipment necessary to the proper functioning of such items, and durable and non-durable medical equipment not available under the Medicaid State Plan. Items and equipment that are of no direct medical, adaptive, or remedial benefit to the participant are excluded.

Participants on the DD Waiver must have the Specialized Equipment and Supplies in their Individual Service Plan (ISP).

Specialized Medical Equipment and Supplies Billing	
HCPCS	Description
E1399	Specialized Medical Equipment/Supplies and Service

1.5.4.1 Provider Qualifications

Providers must demonstrate that the Specialized Equipment and Supplies purchased under this service meet applicable standards of manufacturer, design and installation, including Underwriter's Laboratory (UL), Food and Drug Administration (FDA), and Federal Communication Commission (FCC) standards.

Specialized Medical Equipment must be obtained or provided by authorized dealers of the specific product when applicable (medical supply businesses or organizations that specialize in the design of the equipment).

1.6 Prior Authorization (PA) Procedure for Non-Waiver Items and Services

The medical and documentation requirements set by the Department for most commonly requested DMEPOS items which require a PA are captured in the [Idaho Medicaid DMEPOS PA Policy and Medical Criteria](#). This material also explains in detail the PA procedural requirements and provides direction as to how to submit a PA. A copy of the Idaho Medicaid DME/Supplies Request form is available at www.idmedicaid.com or call Provider Services at 1 (866) 686-4272 to request a paper copy. When a PA for DMEPOS is required, the provider must obtain the PA prior to delivering the item even if the participant has other third-party insurance. The only exception is when the primary insurance is Medicare.

Medicaid payment will be denied for any medical item or service, or portion thereof, which was provided prior to obtaining authorization. An exception may be allowed on a case-by-case basis in which, despite efforts on the part of the provider to submit a timely request or due to events beyond the control of the provider, prior authorization was not obtained; e.g., a hospital discharge, outside of business hours, etc. An explanation of the delay in submission must accompany the request and be submitted to the Department for an exception request.

If an individual was not eligible for Medicaid at the time items were provided but was subsequently found eligible pursuant to *IDAPA 16.03.05.051.03*, the medical item or service will be reviewed by DHW using the same medical necessity guidelines that apply to other prior authorization requests. The request must be submitted within 30 days of the date the provider became aware of the individual's Medicaid eligibility.

Claims for services requiring PA will be denied if the provider did not obtain a PA from the Department. In addition, the provider may not bill the Medicaid participant for equipment and/or supplies not reimbursed by Medicaid because the prior authorization was not obtained in a timely manner or because the provider failed to verify that a PA was required.

For information regarding prior authorizations, providers can:

- Check participant eligibility and PA requirements through your Trading Partner Account at www.idmedicaid.com;
- Contact DXC Technology Medicaid Solutions at 1 (866) 686-4272 or 1 (208) 373-1424 in the Boise calling area; and
- Check the Idaho Medicaid [Numerical Fee Schedule](#) available online for items that always require a PA.

Prior authorization requests with supporting documentation are submitted to 1 (877) 314-8782.

1.7 Documentation Requirements

The vendor is required to obtain all medical necessity documentation prior to billing for DME and supplies. If the supplier is also the ordering physician, a separate order is not required, but all documentation requirements must be met by the medical record. Documentation must be kept on file for five years after the date of service.

Documentation must include all of the following:

- The participant's medical diagnosis and description of the current medical condition that makes the equipment or supplies medically necessary;
- Estimation of the date range the medical equipment or supply item will be needed, and the frequency of use. As needed (PRN) orders will not be accepted without instructions on how/when the medical equipment or supplies will be used;
- For medical supplies, the description and quantity of the supply needed per month;
- A full description of the medical equipment requested. All modifications or additions to basic equipment must be documented in the attending physician's prescription;
- The physician's detailed written order detailed in the subsection below;
- Verification that the participant has met face-to-face with the physician within six months of the order for equipment or supplies;
- Invoice or quote from the manufacturer that includes the manufacturer's suggested retail pricing (MSRP) for items that do not have an established rate on file;
- Medical necessity documentation as required by [IDAPA 16.03.09, "Medicaid Basic Plan Benefits."](#)

1.7.1 Physician Detailed Written Orders

Detailed written orders are required for all DME, prosthetic, orthotic, and medical supplies prior to submitting a claim. Orders may be a photocopy, facsimile image, electronic, or handwritten documents. All orders must clearly specify the start date and the participant's name. If the written order is for supplies that will be provided on a periodic basis, the written order should include appropriate information on the quantity used, frequency, and duration of need. The written order must be sufficiently detailed, including all options or additional features that will be separately billed or that will require an upgraded code. If the supply is a drug, the order must specify the name of the drug, concentration, dosage, frequency, and duration of use. Someone other than the physician may write the order, but the physician must review, and personally sign and date the completed order. Signatures must meet the requirements under the Documentation subsection of the [General Provider and Participant Information](#), Idaho Medicaid Provider Handbook. The date of the order cannot precede the required face-to-face encounter that evaluates the need for item. The order does not have to be written by the physician that conducted the encounter, but they must have reviewed the encounter's documentation.

If the provider does not have an order that has been both signed and dated by the physician before billing Medicaid, the claim is not valid. Orders are valid for one year from the date of signature.

Note: A physician order for equipment repairs is not required if the equipment was originally purchased by Medicaid. If the equipment is not an item covered by Medicaid, Idaho Medicaid is not responsible for repairs.

1.7.2 Physician Verbal/Preliminary Order

Providers may dispense DME, prosthetic, orthotic, and medical supplies based on a verbal or preliminary written order from the treating physician. A detailed written order meeting the requirements of the Physician Detailed Written Orders subsection must be obtained **prior to billing** Idaho Medicaid.

At a minimum, the verbal or preliminary order must include the following information:

- Description of the item
- Participant's name
- Physician's name
- Start date of the order

Providers must maintain copies of the preliminary written order or written documentation of the verbal order along with the detailed written order. If the provider does not have at least the verbal or written preliminary order from the treating physician before dispensing an item, that item is not payable. The term "order" or "written order" in all other Medicaid documentation means "detailed written order" unless otherwise specified.

Items excluded from being dispensed on a preliminary/verbal order:

- Items requiring prior authorization;
- Pressure reducing pads;
- Mattress overlays;
- Mattresses;
- Hospital beds;
- Seat lift chairs;
- TENS units;
- Power operated vehicles; and
- Power wheelchairs.

If a provider bills for any item without a detailed written order, or if there was no appropriate verbal/preliminary order prior to dispensing the item, Medicaid can deny or recoup any reimbursement for the item.

1.7.3.3 Regulations

"Durable Medical Equipment and Supplies: Procedural Requirements." *IDAPA 16.03.09*, "Medicaid Basic Plan Benefits," Sec. 753.01. Department of Administration, State of Idaho, <https://adminrules.idaho.gov/rules/current/16/160309.pdf>.

1.8 Reimbursement

When billing for medical equipment and supplies, the provider must bill with a DME provider number except physicians and podiatrists. Providers must confirm and bill with correct coding verified through the [Pricing, Data Analysis and Coding \(PDAC\)](#) website. The date of service is the date of delivery, and not a date span for when the items were used. Medicaid reimburses durable medical equipment (DME) and disposable medical supplies (DMS) services on a fee-for-service basis. Usual and customary fees are paid up to the Medicaid allowance for purchase. Rental payments are based on 1/10 of the Medicaid allowance. For medical equipment, Waiver items, and supplies that do not have a price on the Idaho Medicaid [Numerical Fee Schedule](#), reimbursement will be seventy-five percent (75%) of the manufacturer's suggested retail price (MSRP), or the manufacturer/wholesaler's invoice to the supplier plus ten percent (10%) and shipping, if shipping is listed on the invoice. Medicaid will reimburse for the least costly means of meeting the participant's need.

Rates for Waiver services will be determined by Medicaid on a case-by-case basis. Services that require a provider to have a license or certification will be negotiated. For Environmental Accessibility Adaptations rates will be the cost of the service up to \$500 or the lowest of three bids if the cost exceeds \$500 for the Aged and Disabled (A&D) Waiver or \$1500 for participants on the Developmental Disabilities (DD) Waiver. DD Targeted Service Coordinators (TSC) should reference the costing and prior authorization guidelines for Durable Medical Equipment and Supplies available through the ACCESS units.

See the [General Billing Instructions](#), Idaho Medicaid Provider Handbook regarding billing, codes without a price on the Idaho Medicaid [Numerical Fee Schedule](#), co-pays, prior authorization, and requirements for billing all other third-party resources before submitting claims to Medicaid.

See the [General Provider and Participant Information](#), Idaho Medicaid Provider Handbook for information on when billing a participant is allowable.
